

Dear Ryan and Ted;

Thank you for introducing us to your Quik-Therm CIS product. In the last couple months, we have noticed a huge difference in the temperature of the basement. After the insulation was installed, we saw an immediate increase in the temperature of the basement by 4 degrees. The install process was quick and left little mess. We have since finished the basement and found your product simple to work with for installing both electrical wiring and drywall.

We wish you all the best with this excellent product!

Sincerely,

Chris and Kelly Burt
