Re: Quiktherm

Just a quick note to thank you for the great service and your amazing insulation system.

When I did my research for the most cost effective and efficient method to insulate the basement of the house I just purchased I am so blessed to have crossed your path. The product you offered did exactly what I wanted and needed. It provided me with double the R factor for efficiency and also eliminated the need for any framing which saved me money and most important time.

The installation was professional and the results exceeded my expectations. My basement has a foot print of just over 2,500 square feet and you can instantly feel the effects with the warmth. As you know we completely transformed the upstairs of my new house and now are experiencing so many friends that wanted to see the finished product. Once they have toured the upstairs they all continued on downstairs and were fascinated by the product most of all the R factor.

I highly recommend this product and will continue to be an ambassador for you and your company.

Respectfully,

Gerald Boiteau
