

Quik-Therm CIS System Testimonial

October 23 / 2015

Living in a house with a damp, and cold basement presented us with several issues. Did we insulate with batting or spray foam? Upon hearing about Quik-Therm we were admittedly sceptical. Having consulted with Ted and Ryan Cullen we were confident in giving it a shot. Our basement went from being a frigid place where no one even wanted to do laundry, to a warm, dry environment that will soon be the go to place in our house. Quik-Therm was installed with ease and efficiency. I was impressed with the fact that it was easily applicable for anyone with DIY aspirations. I would gladly recommend this product to anyone with a new build as well as retro-fit. A fantastic product, thanks again.
